

Smart Light

Arrow

Universal Light Arrow Retrofit Kit – turn any board into a connected board.

Our universal retrofit kit can be installed on any light arrow. Once connected, your arrow board becomes a more effective traffic management system, enabling it to communicate work zone information to motorists, and other relevant parties. Access our JamLogic software platform to view the status or data logs of your arrow boards, and indicate lane closures in navigation systems in real-time.

Features

Improved safety

Road authorities, traffic management companies and maintenance contractors know where all closures are located to enhance safety

Enhanced mobility

Road authorities can proactively manage traffic conditions

Transparent Technology

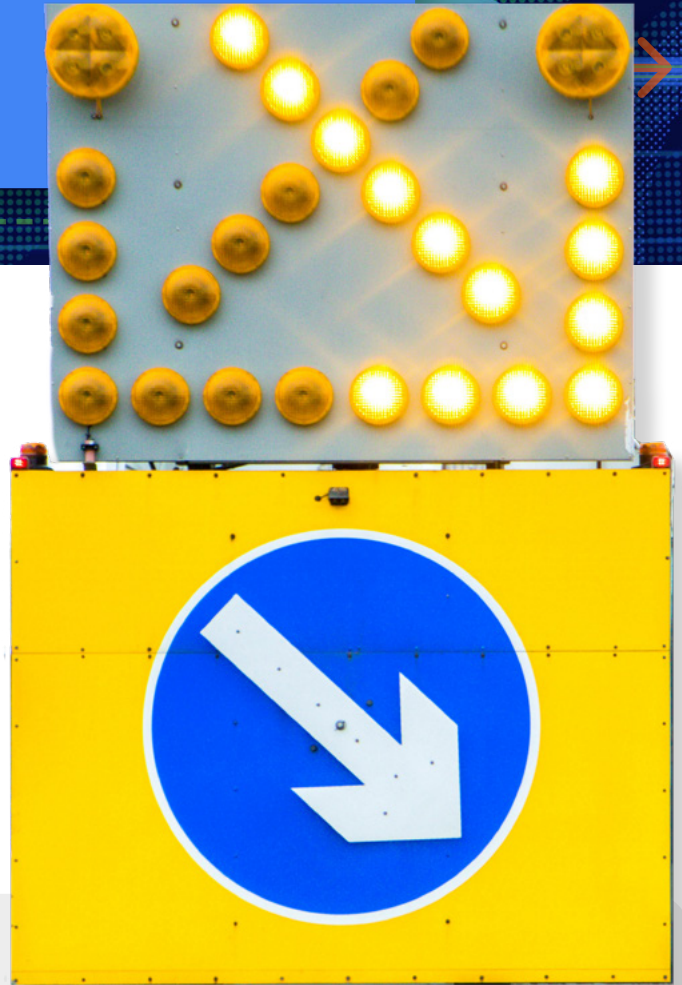

Information can be sent to 3rd party data for enhanced travel information

Work Zone Closure data

Road authorities have a history of work zone locations, direction (north/south bound) and duration

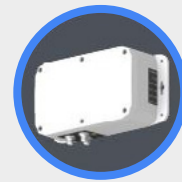

Applications: work zone that has a lane closure with an IPV or Light Arrow | utility and maintenance crews | rolling lane closures | road closures

Technical specifications

Our Smart Light arrow can provide:

- Customers with lane **closure information**
- A record of light arrow **activation and history**
- **GPS location** of all light arrows in the field
- More **accurate information** about closures to 3rd party data providers and connected vehicles
