

Solar Speed Trailer

The Solar Speed Trailer is designed to display real-time speed information and feedback messages to motorists, reducing speed and creating a safer road environment.

It can be used for speed studies near schools, in residential areas, or anywhere controlling traffic speed limits has become an issue.

Features

Combine speed indication with **reflective regulatory sign**

Portable, safe and easy installation on site

2 year warranty on all electronics

Environmentally friendly and energy efficient

Problem-free maintenance

Solar-powered: no engine maintenance, noise or pollution

Visibility in all light and weather conditions

Data logging option for speed studies

Available with stealth technology

Over speed flash mode

Applications: transport | security | rail | manufacturing | construction sites | events
