

Work Zone Location Marker

Smart, connected work zone tracking

Improve scheme safety and track all Work Zone start and end points; monitoring your projects through our JamLogic™ software. All data, including historical, is stored for the project team and client to view at any time. Works are mapped in JamLogic™ and the WZLM is connected to WAZE, enabling road users to be informed of all planned/reactive works.

Features

Date and time stamped for beginning and end of scheme

GPS location, road name and direction of works

Historical **data capture** of all previous works regionally

Transparent data exchange

– information can be sent to 3rd party agencies or project teams to further enhance travel information

Sensors Connect to WAZE

Applications: work zones | work zone that has a lane closure | utility and maintenance crews

T: 0800 690 6867

About MobileVMS

Established in 2009, Mobile VMS provides digitally integrated traffic monitoring, control, and information solutions across the UK road network.

We're best known for our industry-leading VMS fleet but we're more than that. We deliver smart, energy-efficient solutions that help our clients manage traffic, improve safety, and communicate clearly with road users.

AT THE HEART OF EVERYTHING WE DO ARE FOUR GUIDING PILLARS:

CUSTOMER

INNOVATION

COLLABORATION

SUSTAINABILITY
