

# Solar Sensor Trailer

Ideal for mounting cameras, RTMS, radars and microwave detectors, MVMS Portable Solar-powered Sensor Trailers are made from sturdy, quality materials that last long and help lower operating costs. Sensors enable monitoring of traffic speeds, volumes etc. and the logging of this data for future reference to identify patterns and problem areas.

## Features

**Rapid deployment**

**High accuracy - over 97%**

**GPS modem for asset mapping**

**Installation options**

Doppler radar can be mounted on both sensor trailer with mast OR Mobile VMS

**Bi-directional traffic measurements**  
(RTMS only)

**Variety of data that can be captured**

RTMS can determine speeds, vehicle length (in bins), occupancy of lanes (%), volume (vehicle counts) & headway
