

Stealth Technology

Our VMS are the only signs on the market to offer Stealth Technology. This innovative design makes battery theft obsolete and helps to significantly reduce battery maintenance and repair costs. With a cleverly hidden battery compartment and long-lasting sealed batteries, theft and maintenance are no longer a concern with our VMS.

Benefits

No battery theft

**Cleverly concealed
long-lasting batteries**

**Maintenance-free
for up to five years**

How does it work?

Our VMS have a cleverly hidden battery compartment (see the right image) that deters thieves from stealing batteries. In addition, our sealed batteries can run up to 3 years without recharge or battery swaps which makes them significantly more efficient than standard VMS.
